**SINGAPORE – Traceability solutions specialist FibreTrace reports that it’s secured a European patent for its ‘Photon Marker System in Fibre Material’.**

**The company, whose technology enables companies to monitor the movement of goods throughout the supply chain, attained its US patent for the fibre-based solution in 2019.**

**Co-founder Danielle Statham said: “It’s encouraging to see the rapid pace at which the global fashion and interiors industries are moving towards complete transparent and traceable solutions. Finalising the European patent for FibreTrace is recognition for the hard work, research and development of our team which provides brands and manufacturers full confidence in the origin of fibre and integrity in their claims.”**
